Exploring Movie Trends for Our New Movie Studio

A DATA-DRIVEN APPROACH TO FILM PRODUCTION

NAME: DOUGLAS OTACHI
CONTACT INFORMATION: DOUGLAS OTACHI (LINKEDIN)

Overview

Objective

To explore successful film types and their box office performance .

Importance

Identifying actionable insights for our new movie studio.

Current Industry Landscape

The film industry faces intense competition with major studios producing original content to attract viewers.

The film industry is rapidly evolving, with significant competition among major studios to create original content.

Streaming services and traditional studios alike are investing heavily in high-quality movies to attract and retain audiences.

Business Need

Our company aims to enter this competitive market by establishing a new movie studio.

There is uncertainty regarding which types of films will resonate with audiences and perform well financially at the box office.

Our goal is to reduce risk and maximize the potential for box office success by leveraging data-driven insights.

Objective of the Analysis:

Conducting exploratory data analysis (EDA) on existing movie datasets to uncover trends and insights that can inform our film production strategies.
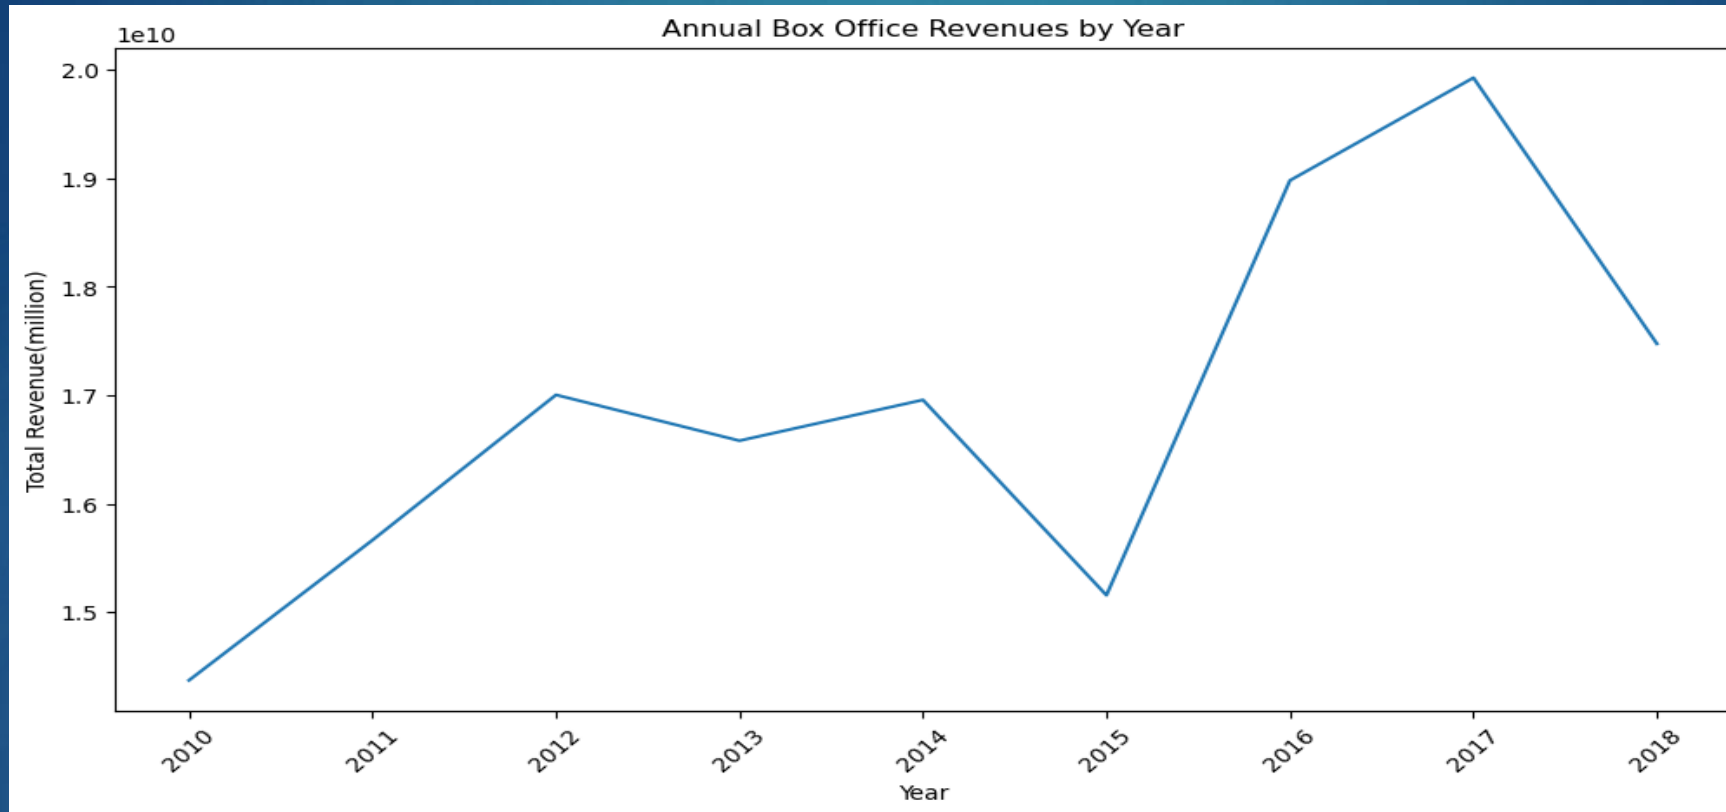

Focusing on determining the characteristics of successful films based on box office performance and audience reception.

Audience-Driven Decision Making

By identifying the most lucrative genres, popular themes, and key success factors, we will be better positioned to develop films that meet audience demands and expectations.

The findings will guide strategic decisions on movie concepts, target demographics, and marketing approaches.

Yearly box office performance

Annual Box Office Revenues by Year

Recommendations

Focus on specific genres e.g Action ,adventure and Comedy

Balance rating and popularity

Monitor yearly trends
